Subject: "Hum Killer" Audio Isolation Module  
Model: AV-HK1X

### **RDL® INTRODUCES NEW "Hum Killer" AUDIO ISOLATION MODULE**

The AV-HK1X "Hum Killer" isolates mono equipment from sound system inputs to reduce or eliminate "ground loop" hum. XLR jacks with gold-plated contacts make input and output connection simple and quick.

The AV-HK1X "Hum Killer" is part of the versatile AV-PAK™ Series product group from RDL. These durable, all-metal products feature the dark RDL *ULTRASTYLE™* color complement making the modules ideal for use on stage as well as in an office or meeting room.

Galvanic isolation between the input and output is provided by a studio quality audio transformer. The AV-HK1X breaks the "ground loop" connection that can produce hum in a sound system. The input connector shield does provide a radio frequency ground return, thereby preserving system immunity to radio interference.

The AV-HK1X is a rugged product designed for portable use. For fixed installations, a mounting bracket is included. Wherever mono ground isolation is required for a balanced audio input, the AV-HK1X is the ideal choice. Use the AV-HK1X with other RDL modules and products to form a complete audio/video system.
