

# AV SYSTEM FOR CORPORATE FACILITY

## Boardroom AV System

### Description:

Three compact RDL EZ-series modules handle all the audio and video signals for both local presentations in this boardroom and to interface with video conferencing. The EZ-MX4ML Mic and Stereo Line Audio Mixer and the EZ-MXA20 20 Watt Stereo Audio Mixer Amplifier together provide 3 mic inputs with phantom power and 3 stereo line-level inputs. The EZ-MXA20 provides 10 Watts to each of the 8 Ohm speakers in the room and allows for bass and treble tone control adjustment. The EZ-VM22E VGA/XGA Switcher/Equalized Amplifier switches between the video conference system and the local video source. It also routes the selected video source to both monitors in the room. All the RDL system electronic products are mounted in an EZ-CC6 Component Chassis. The EZ-RA6 Rack Adapter is available for rack mounting of the EZ series modules.
