

BASIC CLASSROOM W/ INTEGRATED MIXER AMPLIFIER ON AV CART

35 Watt Mixer Amplifier Powers Portable Classroom Audio System

HD-MA35U
35 Watt Mixer Amplifier
4 Ohm / 8 Ohm

Description:

This portable system provides robust amplification for portable speakers from multiple audio sources. Audio levels from a laptop computer, CD player and instructor's microphone can be independently adjusted on the HD-MA35U, which also provides tone control to optimize audio for the room.

The only active RDL component is the HD-MA35U which powers up when audio is detected. When the system is inactive (no audio in use) it enters the sleep mode, consuming less than one watt for optimum energy conservation. The HD-MA35U returns to active mode (turns on) automatically when an audio input becomes present.

Parts List
